Prudential indicators – explanatory note

Debt

There are two limits on external debt: the ‘Operational Boundary’ and the ‘Authorised Limit’. Both are consistent with the current commitments, existing plans and the proposals in the budget report for capital expenditure and financing, and with approved treasury management policy statement and practices. They are both based on estimates of most likely, but not worst case scenario.

The key difference is that the Authorised Limit cannot be breached without prior approval of the Council. It therefore includes more headroom to take account of eventualities such as delays in generating capital receipts, forward borrowing to take advantage of attractive interest rates, use of borrowing in place of operational leasing, “invest to save” projects, occasional short term borrowing to cover temporary revenue cash flow shortfalls as well as an assessment of risks involved in managing cash flows.

The Operational Boundary is a more realistic indicator of the likely position.

Interest rate exposures

The maximum proportion of interest on borrowing which is subject to fixed/variable rate of interest.

Investments

Interest rate exposure

The purpose of these indicators is to set ranges that will limit exposure to interest rate movement. The indicator required by the Treasury Management Code considers the net position of borrowing and investment and is based on principal sums outstanding.

Principal sums invested

This indicator sets a limit on the level of investments that can be made for more than 364 days.
